EXPERIENCE

SOFTSENSOR.AI | MERN Developer Intern
May 2025 – Present | Jaipur, Rajasthan
- Contributed to the development of a fleet management solution, working across both frontend and backend using.
- Collaborated within an agile team to implement new features, improve performance, and ensure scalability of the platform.
- Refactored legacy code to reduce complexity, enhance maintainability, and align with current development standards.
- Implemented and maintained CI/CD workflows using Git and GitHub Actions to streamline deployment and testing across development branches.

ANUIN TECHLOGIX | Web Developer Intern
July 2023 – September 2023 | Jaipur, Rajasthan
- Worked on frontend of Restaurant Management System using React-Redux, MUI and tailwind CSS.
- Built and integrated dynamic frontend components for managing orders, menus, and reservations.
- Collaborated with backend APIs to enable real-time updates and ensured seamless user experience across devices.

PROJECTS

ODEON | Monitor Spotify Usage | ○ July 2025
- Full-stack Spotify analytics platform using React (TypeScript), Node.js, Apollo GraphQL, and LowDB.
- Developed personalized dashboards showcasing top tracks, artists, genres, mood metrics, and real-time listening trends and playlists recommendation
- Utilized AWS Elastic Beanstalk to deploy the server

BUYORA | E-Commerce Platform | ○ May 2025
- Full-stack e-commerce platform using Flask (backend) and React with Redux-Saga (frontend), supporting both customer and seller roles.
- Implemented features such as product listings, cart management, order processing, and authentication with role-based dashboards.
- Designed scalable RESTful APIs and ensured smooth state management and asynchronous data flow using Redux-Saga.

APPOINTMENT MANAGER | Appointment Booking and Management Platform | ○
March 2025
- Developed a full-stack appointment management platform for businesses and users to schedule, manage, and track appointments in real time using the MERN stack and Tailwind CSS.
- Implemented secure role-based authentication for users and admins via Passport.js, JWT, bcrypt.js, and OAuth.
- Built RESTful APIs with Express.js, integrated real-time availability tracking, automated email notifications (NodeMailer), and media uploads using Multer and Cloudinary.

EDUCATION

SKIT, Jaipur *Nov 2022 – Aug 2026*
Bachelor of Technology, Computer Science (Artificial Intelligence)
CGPA: 7.96 / 10

Ryan International School, Jaipur
Class XII (CBSE) *2022*
Percentage: 82.8%

Ryan International School, Jaipur
Class X (CBSE) *2020*
Percentage: 92.2%

SKILLS

PROGRAMMING

Node.js	**Python**	**GraphQL**
JavaScript	**Flask**	
TypeScript	**Express.js**	

TECHNOLOGY

MongoDB	**Docker**
PostgreSQL	**Git**
AWS	**Linux**

COURSEWORK

Data Structures and Alogrithms
OOPS
Operating Systems
Computer Networking
Machine Learning
